Business intelligence, management consultancy and support services for "High Technology" companies in the international automotive, transit and surveillance markets.

Digital Grape Business Services Ltd, is a specialist consulting Services Company with Specific experience of technologies, markets, investments and projects involved with CCTV surveillance systems, Homeland Security projects, Intelligent Transport Systems, GPS tracking services, Telematics and electric/hybrid power-train solutions.

Our services, offered via a network of experienced technology and business management specialists, are used by government agencies, financial Institutions as well manufacturers and users of high technology systems to develop, improve and expand their operations and markets.

We welcome opportunities to offer our management support and consulting services to government agencies, transportation operators and commercial companies in the UK, Europe, the USA or Asia requiring management support, specialist business/market intelligence or assistance in technical project management and planning.

- Consulting
- Business Intelligence
- Technology

Business support and consulting services for technology companies based on 'hands on' experience!

Recent projects have seen our technical management and business development skills applied to a verity of application areas where clients, both government based and commercial, have required specialist business management and technical support.

With specialist experience of CCTV surveillance, Video analytics, Intelligent Transport Systems, GPS tracking, Telematics and more recently hybrid and electric power-train technologies, our consultants can assist clients in various aspects of contract support, project management, technology selection and specification as well as market evaluation and process development.

Acting as advisors to government agencies involved in research and development of advanced technologies, as well as leading the development of new investments in these areas has also provided Digital Grape Business Services with access to key decision makers at the very heart of major projects in both Europe and the USA.

Current services offered to clients include:

Technical management support

- Technical project review and assessment.
- Specifications and procurement development.
- Project and contract management support
- CCTV Systems testing and evaluation
- Video Analytics development and support

Business development support

- Management support
- Due diligence
- M&A strategy development
- Market development
- Busines intelligence
